<sup>1</sup>When mounting a RF roller floor with adaptor it is recommended that the fridge be mounted on the passenger side of the vehicle to allow east-west airflow for the compressor.

<sup>2</sup>Ventilation holes should be opened/cut on the side floor kit to allow compressor ventilation, especially on larger fridges.

<sup>3</sup>RFFKADP is not recommended for use with the ARB Elements fridge due to insufficient ventilation with the RFFKADP adaptor only.

<sup>4</sup>Roller drawer table only suits RD drawers.

<sup>5</sup>Extra BEP500 Panel required for two RF fitout.

<sup>6</sup>RFFKADP adaptors may need carpet removed to suit RFH drawer height. See instructions.

<sup>7</sup>The drawer system will not fit under the cassette for the Wildtrak roller cover. The Wildtrak tub liner is incompatible with the drawer systems. Removal of the roller cover and tub liner will accommodate the drawer system.

**ARB DELUXE BARS****WINCH BARS**

<sup>7</sup>**Important Note:** Due to the unique inboard positioning of the low beam headlamps on this vehicle, on VX, ZR and Kakadu Models with HID (Xenon) headlamps some minor shadowing can be expected from the bull bar and other accessories. This does not affect the headlight performance or compliance with ADRs. ARB recommends fitting the Sahara style bar to VX, ZR and Kakadu Models. ZR and Kakadu Models can also have an optional centre grille located camera. Vision from this camera will unavoidably be obstructed in some cases where bars and accessories are installed. The radar anti collision system option in Kakadu and ZR is also located in the grille badge. Structures forward of this device may affect the operation of this device.

<sup>8</sup>Recommended For Winch Fitment On VX & Kakadu Models Where Anti-Collision System Is Located In The Grille.
