OVERVIEW

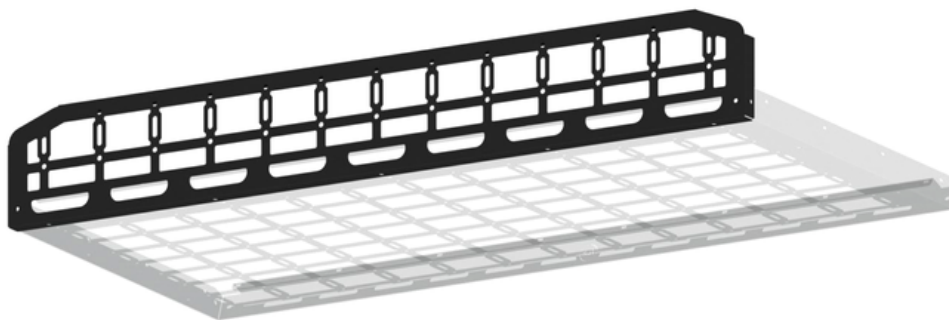

When space is tight, but you've got plenty of gear, the new Alpine Series Storage System from TLR Products delivers a smart, modular solution to help you make the most of your rear cargo area in your Toyota Prado 250 Series / Lexus GX550.

Whether you're heading off-road, setting up camp, or just keen to keep things organised, this system is built to take it all on – with practicality and flexibility at its core.

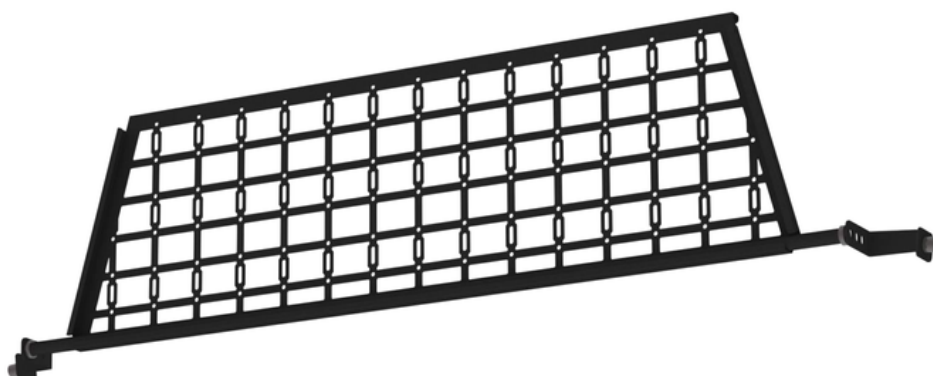

At the centre of it all is the **TLR992101** – Alpine Series Storage Shelf – a lightweight overhead platform that mounts above your boot space, keeping smaller items secure and within easy reach from both the rear door and second-row seats. It's perfect for stashing soft gear, first aid kits, or recovery essentials – anything you want out of the way but still close at hand. This is your main platform for elevated storage and it's fully compatible with all Alpine Series accessories below. From here, you can customise your setup to really make it your own.

**TLR992101**

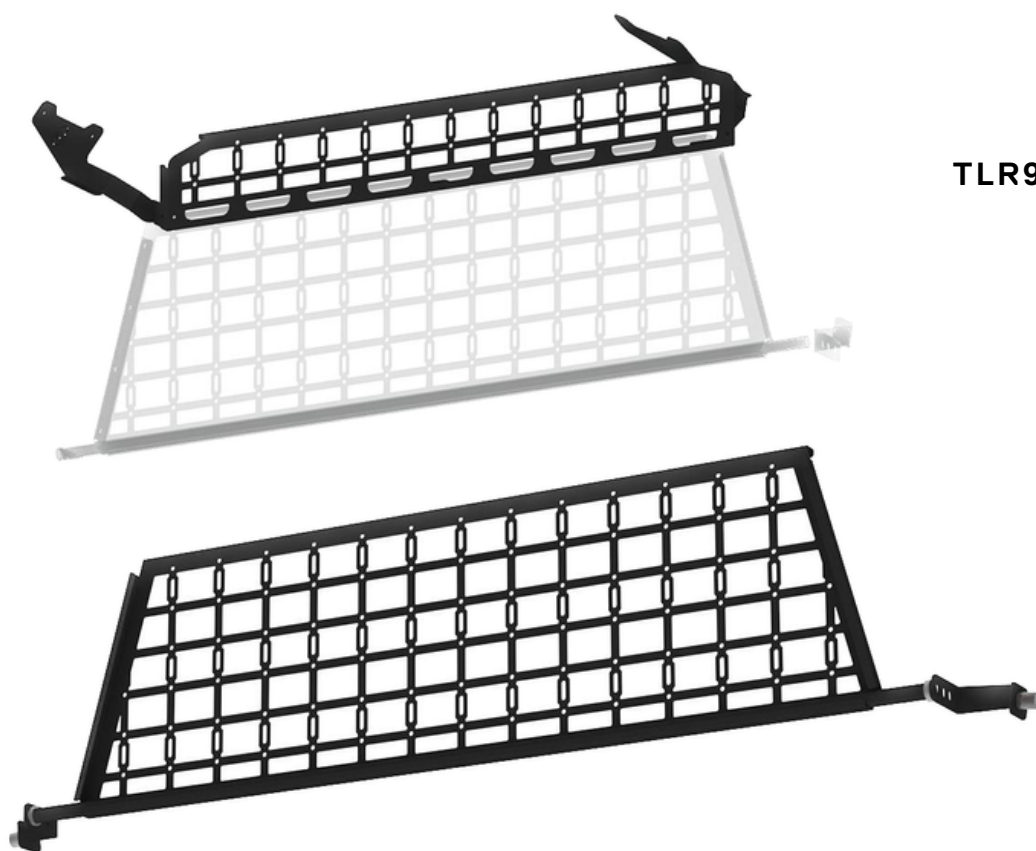

TLR962102 – Front Shelf Riser: Adds a barrier at the front of the shelf to prevent gear falling into the cabin. Ideal for keeping things secure during travel. Included in the Shelf + Riser Bundle (TLR992102).

**TLR962102**

TLR962101 – Luggage Divider to suit shelf: A solid partition between the cargo area and second row. It can be used with or without the shelf for added safety and organisation.

**TLR962104**

TLR962104 – Stand-Alone Divider Bundle: Includes the Luggage Divider, Riser, and brackets for vehicles without the storage shelf.

TLR962104
